EDUCATION

Rajshahi University of Engineering and Technology (RUET)
Bachelor of Science in Computer Science and Engineering

CGPA: 3.46 / 4.00

Rajshahi, Bangladesh
March 2022 - July 2026 (Expected)

Notable Courseworks: Data Structures and Algorithms (DSA), Discrete Mathematics, Database Management Systems (DBMS), Operating Systems (OS), Object Oriented Programming (OOP), Software Engineering, Computer Networking, Machine Learning, Computer Security

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript
- **Web Technologies:** React (basic), Node.js, Express, Django
- **Databases:** MySQL, MongoDB (basic)
- **Tools and Platforms:** Git/GitHub, Postman, VS Code, Antigravity
- **Agentic Coding Tools:** Opencode, Codex, Claude Code (basic), GitHub Copilot

COMPETITIVE PROGRAMMING

- **Codeforces:** Max Rating: **1207** (Ranked **Pupil**) [\[Link\]](#)
- **Leetcode:** Max Rating: **1538** (Top **34.14%** in the world) with **450+** problems solved [\[Link\]](#)
- **Codechef:** Max Rating: **1455** (Ranked **2***) with **60+** problems solved [\[Link\]](#)
- **Hackerrank:** **200+** problems solved with **Gold** badge in problem solving [\[Link\]](#)
- **CSes:** **100+** problems solved [\[Link\]](#)
- Proficient in algorithmic problem solving, having solved **1900+** problems across various online judges [\[Link\]](#)
- Problem Setter, Tester and Reviewer in RUET Intra University Programming Contest, Codesmash 2022 [\[Link\]](#)

PERSONAL PROJECTS

Codeforces Problem Recommender [↗](#)

[View on GitHub](#)

- Developed A full-stack web application that takes a Codeforces handle and recommends personalized competitive programming problems by mining full submission history of the user.
- Implemented a service-layer backend (Django + DRF) with a thread-safe rate limiter, 30-min in-memory cache for a 10k-problem catalog, and a full test suite (unit + integration).
- Implemented dual-layer input validation, graceful API error degradation, structured logging, and env-based secrets management.
- Built using **React**, **Django**, **Django REST Framework** and **Codeforces Public API**.

Expense Tracker Application

[View on GitHub](#)

- Developed a full-stack expense tracker application for users to manage their finances by tracking income, expenses, and generating insightful reports.
- Implemented JWT authentication and refresh tokens for secure user sessions.
- Created a RESTful API for managing transactions with CRUD operations and pagination for efficient data retrieval.
- Built using **React**, **Node.js**, **Express**, and **MongoDB**.
